## Benefits using Nutreeno Liquid Fertilizer

- Increases yield by flower initiation and retention.
- Stimulates metabolic processes and energizes the plant.
- Significant reduction in labour and warehouse cost.
- Easy to use and light in weight.
- No leaching. No oxidation.
- Preserves natural soil eco system.
- Safeguards environment.

## LIQUID FERTILIZER

## NUTRIENT FOR HIGHER YIELD

➔ About Us

Malaysian Agro Products Established in Kuala Lumpur, Malaysia, specializes in delivering high technology nutrients, fertilizers and other agricultural products.

➔ Objective

Our objective is to be the most successful, most innovative and respected eco-friendly Agro Company in Asia by enabling our brands reach and benefit every plantation and orchard across the globe.

➔ Research & Development

Through our extensive Research & Development, we have come up with the series of nutrient fertilizers in Liquid form which is suitable for increasing the productivity in Oil Palm, Coconut, Dates, Olive, Cocoa, Mango and other fruit trees

➔ Our Commitment

With continued diligence in the realm of high-tech research, we are confident that our company will deliver more products and services to meet the agricultural needs. As a forward-looking company, we are keen to work with regional and global distributors who are interested in making greater inroads in to the agriculture industry of tomorrow.

➔ What is Nutreeno Liquid Fertilizer?

Nutreeno Liquid Fertilizer provides optimum level of nutrient through its unique formulation and delivery system.

Nutreeno Liquid Fertilizer is enriched with macro, micro-nutrients and enzymes. The enzymes act as a catalyst and stimulates metabolic functions of the plant system.

As a result, plants exhibit stronger growth and increased resistance against diseases, have higher rate of flowering and fruit setting. Fruits are bigger, sweeter and juicier.

Nutreeno with its unique delivery system is a breakthrough in Precision Farming. It addresses the key areas of Precision Farming:

Technical perspective:  
Better time management at the farm level

Environmental perspective:  
Complete absorption of nutrient prevents pollution of environment and water systems.

Economical perspective:  
Increase in efficiency through yield increase and / or reduction of the input (Nutreeno uses 100-200 ml/tree/year)

Agronomical perspective:  
Better fertilization management

➔ Application Methodology

	<p>1 Drill a hole of 20mm diameter. Height 2 ft above ground level at 45 degree angle. Depth 90 - 180 mm.</p>	APPLICATION STEPS
	<p>2 Clean the hole and fit a plastic plug into the hole.</p>	
	<p>3 Draw 25-50 ml (based on the type of crop) of Nutreeno by using a syringe and Inject into the plastic plug</p>	
	<p>4 Close the cylinder with a cap.</p>	

Precision Farming	
Traditional Fertilizer	: 10 - 12 Kgs / tree / year
Nutreeno Liquid Fertilizer	: 100-200 ml / tree / year (25-50 ml per tree/3 months once /4 time a year)

Social Responsibility....

- Farmer's wealth creation.
- Environmental Management through Precision Farming.
- Promotes farmers' wellbeing by minimizing hazardous effects.
